

Received by email from Kevin Murray, Bord Gais Energy on 21 August 2014

Hi Mo,

Please see below responses to outstanding proposals

1. A062 – ‘Capacity Allocation Mechanism’ – Transitional arrangements

Bord Gáis Energy (BGE) agree to the proposal and welcome the flexibility offered (the “to do nothing” option is too expensive to be considered)

2. CER Presentation on options for Capacity Allocation. – Auction Bundles

Based on the presentation provided, BGE believe that option C will provide more flexibility in offering gas supplies to NI. More detail is required on how this auction would take place, how much capacity is available, what are the timelines etc.

3. A059 ‘LDM Change of Shipper Arrangements’

See attached response to proposal A059.

Please contact me if you have any queries

Regards

Kevin
