

**Application for Change to the
BGE(Northern Ireland) Transportation Network Code Modification Rules.**

Proposed Change:

BGE(NI) submitted Code Modification Rules to the Authority on 12th August 2004, as required by our Conveyance Licence of 12th February 2002. The BGE(NI) Code Mod rules are similar to the modification rules to the other Transmission Codes in Northern Ireland. BGE(NI) periodically review the Code Mod rules with the aim of keeping the Code Mod rules consistent with other Code Mod rules in Northern Ireland.

BGE(NI) have undertaken such a review in conjunction with PTL, following on from the recent changes to the PTL Code Mod rules. While the principle change to the PTL Code Mod rules is already addressed in the BGE(NI) Code Mod rules (electronically communicated notices), it was decided to update some cross references in the BGE(NI) Code Mod rules to make the Mod rules clearer for industry participants. These changes also ensure consistency is maintained between the DPO's Code Mod Rules in Northern Ireland.

BGE(NI) hereby propose to change the Modification Rules pursuant to Section 13 of the Code Modification Rules and Condition 2.4.5 of the Conveyance Licence. The proposed changes are shown in the attached mark-up of the current Code Modification Rules.

Objective of the Proposed Change:

The proposed changes to the BGE(NI) Transportation Network Code Modification Rules arise from the requirement to clarify references in the current version of the Transportation Code Modification Rules, (version 2.0, 7th November 2005).

The proposed text amendments are included in Appendix 1.

Proposed Change submission date:

18 August 2006

Proposed implementation date:

2nd October 2006

Comments on the Proposed Change:

PS Gas Suppliers and DPOs are requested to submit comments
