

Report by BGE(NI) on Application for Change to the BGE(Northern Ireland) Transportation Network Code Modification Rules

Introduction:

BGE(NI) has prepared this report in accordance with Section 13 of its Transportation Network Code Modification Rules.

BGE(NI) circulated the attached Application for Change to its Code Modification Rules on 21st September 2005 and requested comments on or before the 12th October 2005.

The proposed changes to the Transportation Network Code Modification Rules arise from new Licence requirements relating to the Network Code (Standard Condition 2A.7). In particular, the changes incorporate references to consult all other Designated Pipeline Operators (DPOs) and PS Gas Suppliers on proposed Code Modifications to ensure a continuing high degree of consistency in the Codes throughout the Postalised Network in Northern Ireland. The opportunity was also taken to correct minor typographical errors.

Comments Received:

BGE(NI) received one response on the Application for Change from Premier Transmission Ltd. (PTL), as attached, supporting the Application for Change.

Transporter's View:

BGE(NI) as the proposer supports the Application for Change.

Amendments:

The Modification Rules (Version 2.0), which have been amended to include further typographical corrections by BGE(NI) are attached and will also be available on the BGE(NI) website at www.bordgais.ie/htm/transportation/index.htm following approval.

Implementation Date:

BGE(NI) request that NIAER approve the Application for Change and propose an implementation date of 5 working days after NIAER approval.
