**Modification to the BGE NI Transmission Network Code**

Dear Donal

Further to recent conversations, firmus energy Distribution requests that BGE NI review the Transmission Network Code.

The purpose of the review is to define the areas of the BGE NI Network Code which require modification to facilitate Market Opening for customers with an Annual Quantity greater than 25,000 therms per annum. Specifically reference to the 10 Towns Network offtakes needs to address the potential for of multiple shippers utilising the Distribution System via the Transmission System.

We would be grateful if you could progress this request and update firmus energy accordingly.

Yours Sincerely

*Mary O'Kane*

Transportation Services Manager
