

Role: AIIS Data Analyst
Area: Assets & Infrastructure
Sub-Area: Asset Management
Location: Cork
Salary: Competitive

Duration: Specific Purpose **Ref:** GNI093

Gas Networks Ireland operates and maintains Ireland's €3 billion, 14,758km national gas network, supplying reliable energy to more than 720,000 homes and businesses. The network delivers more than 30% of the country's total energy and 40% of its electricity generation.

We are dedicated to achieving net zero and advancing the energy transition through integrated planning and collaboration with the energy industry. To realise our vision and to be at the heart of Ireland's energy future, we are committed to transforming our network to achieve net zero carbon emissions onboarding biomethane and green hydrogen.

We have a proud legacy, and our values guide how we work every day - drawing on our experience, doing what's right for each other and our communities, and staying energised for the change ahead.

When you join Gas Networks Ireland, you become part of an organisation that invests in its people. We are committed to supporting your growth and wellbeing in a workplace where everyone can contribute and thrive.

The closing date for receipt of applications for this vacancy is 7th May 2026, and applications submitted after this closing date will not be accepted.

The Role:

The Asset Management function within Gas Networks Ireland is responsible for optimising the return from the asset portfolio and considering the financial and regulatory effects of the proposed investment strategies. Asset Management identify, plan and develop investment programmes while achieving an optimal balance between customer requirements, asset efficiency and risk. Asset Management provides single oversight of network assets, enabling it to make key decisions that will optimise overall operation of the system.

The AGI Information Improvement Strategy (AIIS) Project is a multi-year programme of work tasked with improving the quality of Asset Data Capture (ADC) in relation to Transmission network assets, ensuring consistency across drawings, site tagging, Maximo, GNI's Geographic Information System (GIS) and GNI's Supervisory Control & Data Acquisition (SCADA) system by addressing line of sight issues across these data systems for assets in existing AGI's.

Reporting to the Project Technical Lead, the AGI Information Improvement Strategy (AIIS) Data Analyst will manage all end-to-end project information, records and asset data etc. A key focus will be ensuring the quality of data issued to projects and the quality and formatting of data returned from the field.

The AIIIS Data Analyst will also be responsible for updating Maximo in line with Asset Information Standards and with project and new strategic requirements arising from the AIIIS project.

Duties and Responsibilities:

- Play a key role in site remediation readiness through the preparation/development of Above Ground Installation data files used in a desktop and site survey system.
- Ensure all assets are appropriately represented in an integrated data model across the Asset Register, Drawing Management Systems, SCADA and Asset Tagging conventions.
- Undertake thorough quality checks when/where necessary to ensure accuracy of information represented in the integrated data model, as defined in the AGI Data Taxonomy.
- Create / update Maximo Assets and Locations in line with Asset Information Standards with data provided through the AIIIS Project.
- Support the Asset Register Manager in the delivery of the Asset Register Processes and related Planned Maintenance Updates as capacity allows.
- Engage with GNI stakeholders and relevant ESPs to ensure that Asset Information Standard requirements are understood, documented, prioritised and delivered, utilising existing functionality and implementing new data solutions where appropriate.
- Proactively identify, implement and support mechanisms for improving GNI data definition and data capture.
- Support the implementation of a sustainable Asset Information Management (AIM) system for GNI's Above Ground Installations.
- Engage with the Senior Asset Data Architect to maximize the utilization of GNI I.T. systems and system enhancements to ensure new enduring Asset Information requirements are identified and systemised.
- Other duties may be assigned from time to time.

Knowledge, Skills and Experience:

- Relevant technical third level qualification with at least 3-5 years relevant experience.
- Experience of software systems and knowledge in enterprise software systems; experience with Maximo an advantage.
- Highly proficient in EXCEL.
- Knowledge of reporting packages such as SAP Business Objects; SQL experience an advantage.
- Experience with identifying improvement opportunities, generating ideas, implementing solutions and communicating to stakeholders across different departments.
- Must have excellent analytical skills, strong decision-making capabilities and good attention to detail.
- You will be a natural collaborator seeking out opportunities to share knowledge, bring teams together and improve results.

Equal Opportunities Employer

Gas Networks Ireland is an equal opportunities employer, committed to providing a diverse, inclusive, and supportive workplace. Through our ibelong framework, we work to ensure that everyone feels respected, valued, and able to contribute.
