

Integrated Management System Policy

Health & Safety ISO 45001

Deliver a best-in-class safety management system to safeguard our people, our assets, the public and the environment.

Quality ISO 9001

Deliver high-quality product & services. Ensuring compliance, and fostering continual improvement.

Asset Management ISO 55001

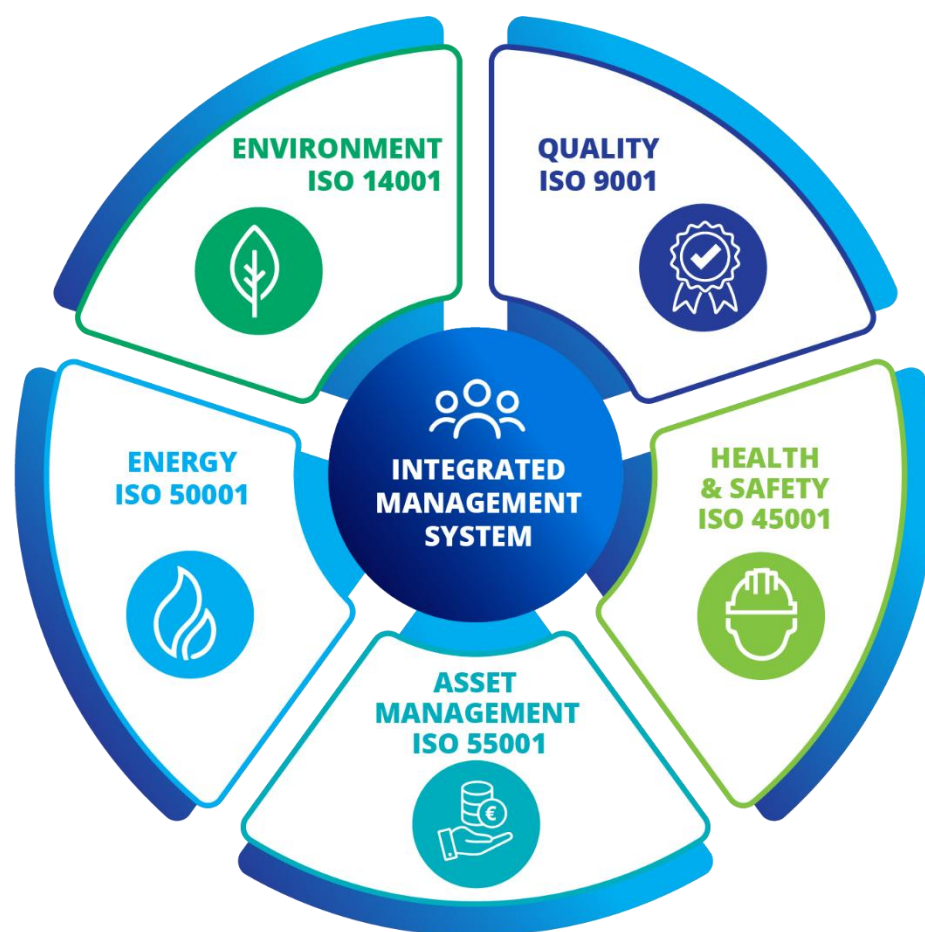

Manage our assets to ensure continual safe and reliable operation, achieve maximum value and enable the delivery of our three strategic ambitions

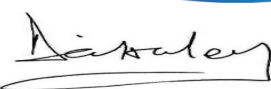

Environment ISO 14001

Minimise environmental impact, prevent pollution, and support Ireland's climate goals.

Energy ISO 50001

Manage energy and Green House Gas Emissions responsibly, improve energy performance, and support decarbonisation.

Signed:  Date: 11th May 2026

David Kelly, Chief Executive Officer, Gas Networks Ireland

Our commitments

- Put safety first in everything we do.
- Meet Ireland's evolving energy demands through the development and operation of resilient and reliable networks.
- Take the necessary actions to enable Ireland's energy security of supply.
- Drive integrated system planning across the energy industry to develop a least-cost, clean and secure energy system.
- Scale biomethane to champion the biomethane industry while preparing to transport biomethane at scale for customers.
- Lead the development of networked hydrogen as a core component of Ireland's future energy system.
- Deliver on our climate change commitments by decarbonising our own operations.
- Deliver innovative and efficient energy solutions for our customers.
- Customer advocate for the right policies that reflect the interests of energy customers.
- Prioritise energy affordability through efficient operations, appropriate strategic investments, and equitable pricing.
- We routinely review our company objectives and targets ensure they are effectively delivered across the organisation.

We will:

- Provide strong, visible, leadership to support and empower our proactive safety first culture while also continuing to enhance our commitment to sustainability.
- Identify hazards, assess risks, and where elimination is not possible, implement controls to reduce risk.
- Grow our network in a sustainable, efficient, responsibly procured and quality assured manner for customers.
- Maintain progress as an asset-centric organization.
- Implement predictive, risk based assessment methodologies to optimise asset safety and extend asset life.
- Sustain and enhance the competency of our people, by providing the necessary resources to address both current and future business requirements.
- Utilise innovative approaches to designing, constructing and managing the network.
- Continue to improve organisational processes and monitor IMS performance.
- Monitor and report areas of concern and non-compliance in order that corrective measures are implemented to prevent reoccurrence.
- Leverage the IMS to support our commercial performance, to satisfy our stakeholders, whilst ensuring a strong customer focus.
- Ensure this policy is understood, implemented, maintained, and communicated to all relevant parties.
- We will comply with all legal and regulatory requirements.
