Reasons to switch to natural gas

Cheaper:

It is one of the most cost effective fuels on the market 18% cheaper than oil, 39% cheaper than bulk LPG and 68% cheaper than electricity.*

Cleaner:

It produces 24% less CO₂ than oil and 57% less CO₂ than electricity, making it the best choice for a greener future.*

Convenient:

It can't be matched for speed and controllability, heating your home significantly faster than electricity.

Reliable:

A constant supply is piped directly to your home, 24 hours a day, 365 days a year, so you don't need to spend time placing orders or relighting your boiler when the oil runs out.

Versatile:

It's the most versatile of all fuels, compatible with a large range of modern appliances including fires, cookers and tumble dryers, along with providing hot water and heating.

Quick Installation:

Typically boiler replacement work will be completed within one working day, before your house has a chance to get cold.

How to get natural gas in your home

Connecting to natural gas is easy. Just follow these steps:

1. Visit gasnetworks.ie to check if gas is available in your area.

2. Apply and pay online, then follow the steps to arrange the appointment for your connection.

3. Have a Registered Gas Installer complete the agreed internal work on your house, including gas pipes and appliances. Decide where to locate your boiler.

4. Choose your preferred natural gas supplier from a full list of companies we will supply to you.

5. Get connected and enjoy all the benefits of natural gas.

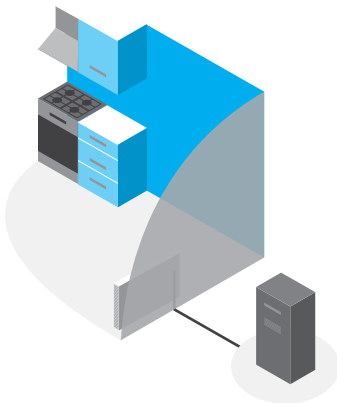

Alternatively, you can contact our Customer Service team on **1800 464 464** to enquire about connecting.

Guide to switching your heating system from oil to natural gas.

Step 1

Heating System - External

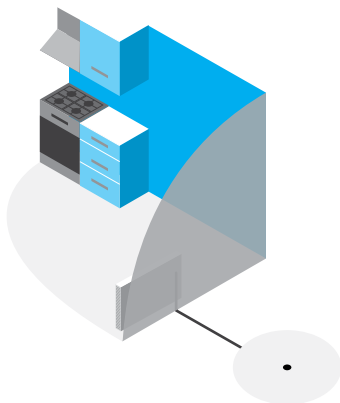

- Disconnect existing heating system from the oil boiler.
- Disconnect the fuel supply (heating oil).

Step 2

Equipment Removal

- Oil boiler is taken out allowing space for gas boiler to be connected.
- Oil tank also removed safely.

Step 3

Select a suitable location for your new gas boiler

a Internal

Locate gas boiler in kitchen or utility room with flue to outside.

b External

Locate gas boiler outdoors in custom weatherproof casing. This can be wall mounted or within a free-standing enclosure.

c Garage or Shed

Replace outdoor boiler in garage or shed location.
