

## NDM Accuracy of Forecasting Report

## Gas Year 19/20

November 2020

## **Report Description**

This report is an ongoing requirement of the <u>Balancing Network</u> <u>Code</u> (Commission Regulation (EU) No 312/2014). The requirement is outlined in Article 42, "Information obligations of the forecasting party towards the transmission system operator", Paragraph 3 "A report on the accuracy of the forecast of a network user's non daily metered off-takes shall be published by the forecasting party at least every two years."

The forecasting party in this instance is the Meter Data Services group, Gas Networks Ireland who will publish the report on an annual basis for the Transporter, after the end of the gas year. The report will be published on the Gas Networks Ireland website.

The data contained in this report is defined as follows:

Data Element	Description
Date	Gas day
Daily Delivered Energy, kWh	Aggregate non-daily metered (NDM) delivered energy for Gas Day D. This information is available in the <u>Transportation Monthly Reports</u> published by Gas Networks Ireland.
Forecast Energy Demand, kWh	Aggregate of the final NDM energy forecasts issued to shippers on Gas Day D.
Accuracy, %	The difference between the forecast and delivered energy at all NDM offtakes for the relevant gas day, in proportion to the delivered energy.

Under the Commission for Regulation of Utilities (CRU) approved Forecasting, Allocation, Reconciliation Procedures (<u>FAR Procedures</u>) the Transporter is required to issue NDM Nominations Advices to each shipper registered as holding NDM Exit Capacity in accordance with Part D, Section 1.7 of the Gas Networks Ireland <u>Code of Operations</u> on a daily basis. The Forecast Energy Demand in the report is an aggregation of the individual forecasts issued by Gas Networks Ireland to each NDM shipper on a given gas day.

There will always be variances between the level of NDM forecasts issued to shippers each day and the actual level of NDM demand on the day. The accuracy of the forecast on any given day will be subject to variations caused by numerous reasons including, but not limited to:

- Changes in weather forecasts;
- Changes in actual weather (and degree to which end-user demand responds); and
- Changes in end-user demand (e.g. change of occupancy).

## **Gas Year 19/20**

Date	Daily Delivered Energy, kWh	Forecast Energy Demand, kWh	Accuracy, %
